- Suitable for the transport of liquid or solid samples from the collection site up to the laboratory where they will be analysed ; especially designed for pneumatic transport.
- Each container features a continuous thread and a red ribbed polyethylene cap.
- High security leakproof seal. Caps ensure a positive hermetic seal from outside as well as from inside due to their inner ridge that perfectly fit the rim of containers.
- Includes a removable spoon on underside of the cap so as to facilitate solid sample collection.
- The removable spoon is 59 mm long.
