Directive 98/79/CE. "In vitro" diagnostic medical devices.

### INTENDED USE

Hospital use and in laboratories, as a container for containment and transport of biological fluids from the human body (urine, faeces, sputum, etc.) and subsequent in vitro analysis thereof.

Highly transparent polypropylene bottles. Grooved red cap with discontinuous thread. Cap material: Red high-density polyethylene. High security hermetic closure, ensured by the internal obturator incorporated in the cap.

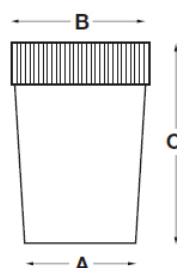

Graduated bottle up to 100ml that incorporates mold graduation and matte band, measuring 33 x 50 mm and that allows writing with conventional markers. In it, there is the following inscription (in mold): Name, N<sup>o</sup>, Date.

Code 409701 (labelled container): The label is designed to write the patient's name, the ward and its number, specimen type, time and date. Dimensions of the label: 55 x 37 mm.

Code 409703, it comes in the same box (bodies and plugs in a bag).

Shelf life: 60 months for non sterile products. For Sterile A or Sterile R models: 48 months.

Storage recommendations: no special conditions, although sudden changes of temperature should be avoided.
