

## Kit HistoPerls

Code product: **361850-0000**

### Composition:

- **Acid Buffer and Potassium Ferrocyanide:**
- **Nuclear Red Solution:**

**10 x 5 ml**  
**1 x 100 ml**

### Applications:

#### Histo-Cytology:

Staining with Kit HistoPerls allows to detect ferric salts called Haemosiderin (pathological pigment located in liver and in ganglions).

Ferric salts appear bright blue.

Nuclei stain red.
