## TECHNICAL DATA SHEET

### Saccomanno's fixative

**Product code:** SL.SACC.XX/XX // RE.2NSXX.XX/XX

**Date of issue:** 06/08/2018 (v6)

<b>Expected aim</b>	Product for the preparation of cyto-histological samples for optical microscopy.
<b>Application</b>	Ready-to-use fixative for fluid cytologic specimens
<b>Principle</b>	The fixative causes lysis of red blood cells and makes the mucoproteins uncoagulated soluble, predisposing the sample for subsequent cyto-centrifugation or filtration. In particular the presence of polyethylene glycol infiltrates and protects cells favoring the adhesion to the slide.
<b>Components</b>	Polyethylene glycol; Ethanol Denat.; Demi-water; [in case of LG (Light Green): + Mal. Light Green]
<b>Warning and precaution</b>	The product must be used exclusively by specialized technical operators. Carefully read the information on the classification of dangerous substances on the label. Always refer to the safety data sheet where are available the information on the risks presented by the mixture, the precautionary measures during use, the measures first aid and the intervention in the event of accidental release. Do not use if the primary container is damaged. The safety data sheet is available on request.
<b>Storage</b>	Store the preparation at room temperature. Keep the containers tightly closed.
<b>Stability</b>	After the first opening, the product is usable until the expiry date, if correctly stored.
<b>Disposal</b>	Hazardous preparation: observe all state and local environmental regulations regarding waste disposal.
